

## GOS Software and ACPML

African Circle Pollution Management Limited is a private Nigerian company, licensed to operate port reception facilities for the collection, storage and processing of ship generated waste on behalf of the Nigerian Ports Authority.

ACPML also provides a wide range of services to both the government and private sector, with a large client base including, Nigerian Ports Authority, Nigerian Maritime Administration and Safety Agency, Niger Dock Plc, Rahamaniyya Oil & Gas, Dredging International Services (Nig) Ltd, Eko Support Services Ltd, Five Star Logistics, C&E Resources, Alraine Shipping, Ivanod Shipping, Niger Dock Plc, Skill Base Logistics, Bristow Helicopters, Van Oord; to name a few.

ACPML operates from the following major ports in Nigeria;

- Tin-Can Island Port / Snake Island Free Zone Enterprise, Apapa Lagos State
- Port Harcourt Port, Rivers State
- Onne Port, Rivers State
- Warri Port, Delta State
- Calabar Port, Cross Rivers State

Yet even with the tremendous growth, ACPML continued to maintain a strong culture that puts its employees and clients first. It's a fundamental reason for the company's achievements. And that "our people, our greatest asset" commitment extends to its dedication to the ACPML workforce, too, which is why they needed a new system for their people management.

ACPML partnered with GOS Software for its HR ERP/Software need. GOS Software offered ACPML a seamless deployment in a single system which was deployed and fully implemented in six weeks.

*In the words of the HR Manager (Garba Eljamil), "the implementation was successfully completed and signed off. I have been involved in the implementation and use of other HR applications but GOS HRM is far more robust and superb".*
